Kia UAE - Q4 Campaigns

Date: October 23, 2026

Case number: 6791

Movement that inspires

Kia Marketing Communications Planning Team

Thank you for your inquiry regarding brand design.

Upon reviewing your materials, we have identified some minor issues.
Addressing these concerns will improve the overall quality of the layout.
Please refer to the guidelines below for detailed descriptions of these elements,
along with pages containing our feedback comments.

If there are any additional questions, please let us know.

With kind regards,
Kia Marketing Communications Strategy Team

1. Feedback Details

The margin values appear to be applied inconsistently. We have found elements subtly encroaching on the margin areas across different sides.

To ensure perfect and consistent brand communication, please check the margin values again and adjust the positions of the elements accordingly.

Please apply the same modification to the other attached image.

Margin

Determining the margin width is the crucial first step in any design application.

We use a simple formula to calculate the ideal margin width.

Margin Formula

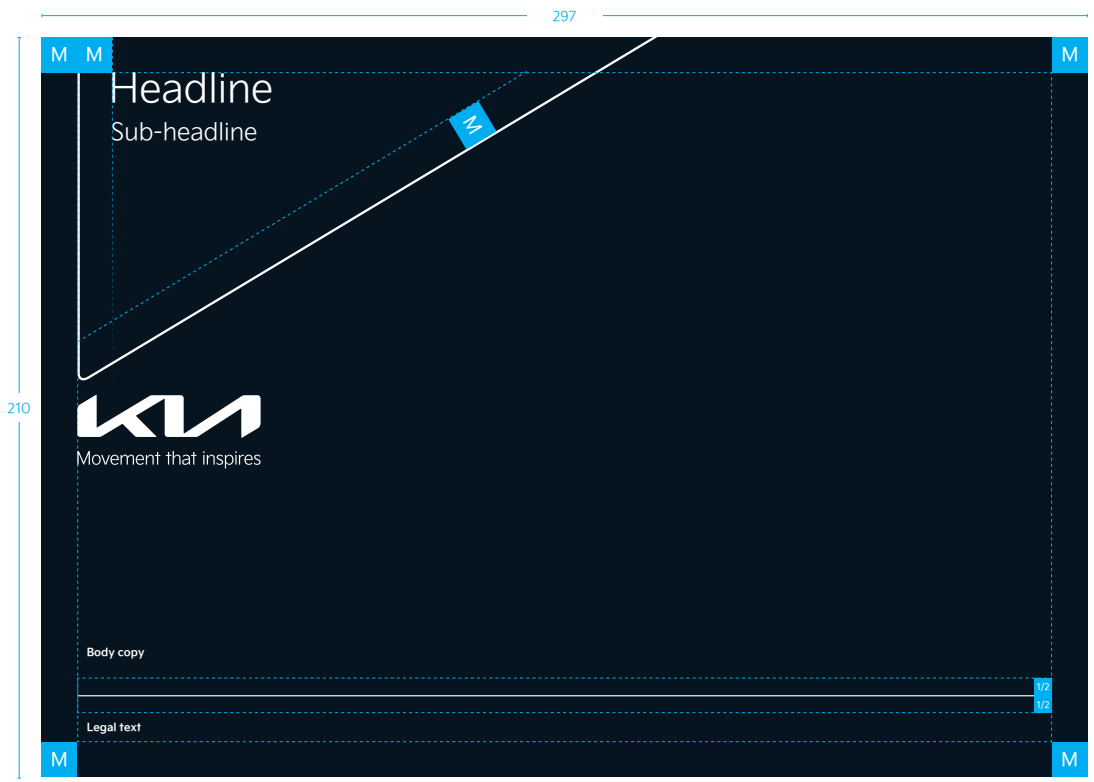

(Width + Height of format) / 50 = M

Calculation	
Width	297
Height	+ 210
Total (W+H)	507
Divide by 50	10

*Rounded to closest whole number

M **Margin size: 10**

If required for visual balance, the outer margin can be extended up to 2 times.
